

## IMPROVED PARKING FOR SECONDARY SITE

### **Staff and visitor parking improvements:**

Our current site has 96 staff with 52 car parking spaces for them. In addition we have 5 additional visitor car parking spaces and 3 additional spaces for our minibuses.

Once completed, the secondary site will have 62 staff on site with 44 car parking spaces plus 10 visitor car parking spaces which includes 2 additional accessible car parking spaces and 2 minibus spaces for the two minibuses that will remain on this site.

### **Student transport improvements:**

Our current site has 226 students and the majority travel by minibuses. The challenge we face currently is getting 22 minibuses on to site quickly without causing congestion on Hykeham road. Currently the buses park along the first part of our drive but this can only hold 8 minibuses before we open the school gates on our playground to let them park safely.

Once completed, the secondary site will have 206 students which is 20 students less. As they are secondary age many more of them travel independently so we anticipate having 16 minibuses each day however the hard court has been designed to take up to 20 minibuses to accommodate the wide spread geography or if students require loan transport. We will have less buses on site and the minibuses will be able to come straight on to site and park on our new extended drive which will be able to accommodate all of the minibuses prior to parking at the back of the school on our new hard court.
